

YETU DATA

#DataMustFall

The cost of data is a massive barrier to communication for the marginalised majority in South Africa. The Yetu Infotech Collective is committed to enable internet access by challenging the profiteering telecoms corporation that are holding communities hostage.

We are exploring a number of possibilities including working with social movements, NGOs, unions & community organisations to develop & maintain their own telecommunication infrastructure, as well as to leverage economies of scale to buy bulk data at affordable rates.

Our first YetuDATA offering is a sim card on the MTN network that beats the corporations:

SAVE FROM 56% to 90%

On average the corporations charge R18.93 per GB on a month-to-month contract, R28.00 for a GB that expires in a day and R83.50 for a GB that lasts a month.

Our data costs R8.33 per GB. Our contracts can be terminated with one month notice.
